Radio Receiver / Radio Transmitters /  
Radio Handsets

8.1

The need for complicated wiring at mains potential, two-way switching, dimming and intermediate wiring a thing of the past. Even low voltage cabling and its segregation with other cables is a non starter with our wireless system.

The AV market has long recognised the need to interface the lighting control with its products. Wireless interface can be achieved with the RS232 input module and simple ASCII string scene selection. Other modules are available from The IS Limited for the integration of motorised blind control, partition control of meeting rooms, DMX interfaces and Volt free output modules.

All the benefits of lighting control without the need for wires. Just choose where you want to have control and that is where you take control. Modules can be quickly and easily installed into any environment, domestic, or commercial, from hotel bedroom to function rooms, restaurants and even churches.

The systems can control resistive loads, Fluorescent loads, 1 -10v analogue dimming, DSI

digital dimming and DALI digital dimming.

Control Panels in 2 button on/off, 7 button 4 scenes, off, raise and lower. Plate finishes available in White, Charcoal, Brushed Stainless Steel, Mirror Stainless Steel, Polished Brass and other finishes to special order.

Hand Held controllers giving 4 Scenes and off plus raise and lower. The radio receivers is available in load types of 250W, 500W, and 1200W.

The home market is one of the biggest growing markets for wireless radio control. Homes can now have dimming anywhere, any place without the need for costly re-wiring and expensive equipment.

Just pick your room or the whole house and put the control plates wherever you like. The control plates each have selectable ID's to allow you to have as many addresses as you need for your house and to ensure that you don't interfere with any other house.
